PROFILE

- Full stack web developer with hands on experience building end to end web applications using React, Node.js, RESTful APIs, and MySQL, including frontend UI development, backend services, and database design.
- Experienced in building modern and scalable web applications, working with component frontend architecture, API integration, and Docker development workflows.
- Delivered data driven frontend features and user permission functionality, working closely with backend systems, with additional experience in website operations and software testing through internships.

EDUCATION

Master of Information Technology 2024 – 2025
University of New South Wales

Bachelor of Network Engineering 2018 – 2022
Sichuan Normal University

SKILLS

- Front end Web Development: React, Vue, JavaScript, TypeScript, HTML, CSS, MUI, PHP, Vite
- Back end development: Node.js, RESTful APIs, PostgreSQL, Docker
- Tools & Testing: Figma, Git, Vitest, React Testing Library, debugging, API integration
- UI/UX: UI design and prototyping using Figma

PROJECT EXPERIENCE

UniTask – AI Learning Assistant Jun 2025 – Aug 2025
Joint Project – University of New South Wales & Monash University **Score: 87 (High Distinction)**

- Developed a full stack educational web platform simulating an AI assistant to support interactive learning between students and tutors.
- Led front end development and UI/UX design using React and Figma, integrating the front end with a modular Python backend via RESTful APIs and contributing to backend database and API design.
- Designed and implemented key features including course and assignment management, discussion forums, a centralized FAQ system, and a chat based AI assistant for real time Q&A.
- Built and maintained frontend tests using Vitest and React Testing Library, implementing API mocks to ensure reliable and maintainable component testing.

BigBrain Quiz App Apr 2025
University Of New South Wales

- Solely developed a single page React application from scratch, implementing the complete front end architecture and user interface.
- Integrated the frontend with backend APIs to support admin authentication, quiz management, and session control without page reloads.
- Designed and implemented core features including a dynamic admin dashboard for quiz CRUD operations, a configurable question editor, and a real time player interface with timers and instant feedback.

- Built an analytics focused results page featuring a top 5 leaderboard, correctness visualizations, and response time charts to enhance gameplay insights.

Saishang Jiangnan Travel website Jan 2022 – Jun 2022
Sichuan Normal University

- Designed and developed a full stack travel website, implementing the overall site structure and integrating front end and back end components end to end.
- Built the user interface using HTML, CSS, and JavaScript, and implemented dynamic server side functionality with PHP and MySQL to support data transactions and site operations.
- Implemented core features including hotel and attraction booking, user registration and authentication, order management, and backend administration.
- Developed search functionality and interactive content management features to improve user engagement and overall usability.

EMPLOYMENT HISTORY

Store Team Member May 2025 – Present
Woolworths

- Assisted customers at self checkout stations and managed manual checkout operations, ensuring accurate and efficient payment processing.
- Prepared and packed online orders with a strong focus on accuracy, speed, and presentation quality.
- Collaborated with team members in a fast paced retail environment to maintain smooth store operations and customer satisfaction.

Operation and Maintenance Intern Mar 2022 – Jun 2022
Suzhou Pengyu Micro-Grid Technology Co. Ltd

- Supported daily website operations and system stability, assisting with basic issue handling, bug fixes, and routine checks.
- Assisted in diagnosing and resolving website issues through debugging and basic security checks.
- Collected and reviewed user feedback to support website optimization and usability improvements.
