0421 103 706 | stellaxiong420@outlook.com

Portfolio: stellaxiong.vercel.app | GitHub: Stella-vv | LinkedIn: stella-xiong

PROFILE

- Full-stack developer with experience building web applications using React, TypeScript, Python/Flask, RESTful APIs, and PostgreSQL.
- Comfortable working across frontend and backend tasks, including frontend structure, API integration, database design, debugging, and system testing.
- Enjoy solving unclear problems by breaking them down, clarifying requirements, and building features that are practical for users.
- Clear communicator and fast learner, with experience working in both technical project teams and customer-facing environments.

EDUCATION

Master of Information Technology University of New South Wales	2024 – 2025
Bachelor of Network Engineering Sichuan Normal University	2018 – 2022

SKILLS

- **Frontend Web Development:** React, TypeScript, JavaScript, HTML, CSS, MUI, Vite
- **Backend Development:** Python, Flask, Node.js, RESTful APIs, PostgreSQL, MySQL
- **Testing & Tools:** Git, Docker, Figma, Vitest, React Testing Library
- **Engineering:** Full-stack development, API integration, debugging, database design, system testing, technical documentation
- **Communication:** Requirement clarification, client-facing communication, teamwork, problem-solving, fast learning

PROJECT EXPERIENCE

UniTask – AI Learning Assistant	Jun 2025 – Aug 2025
Joint Project – University of New South Wales & Monash University	
• Built frontend workflows for an AI learning platform, translating product requirements into reusable React components and full-stack features. • Developed React, TypeScript, and MUI modules for course management, assignment workflows, and role-based user interactions. • Integrated RESTful APIs with a Python Flask backend, debugging data flow issues across frontend, backend, and PostgreSQL. • Contributed to database and API design for course, assignment, and user-role management. • Tested core user journeys, fixed bugs, and collaborated through code reviews and technical discussions to deliver the project within a fixed timeline.	
BigBrain Quiz App University of New South Wales	Apr 2025

- Built a single-page React quiz application from scratch, covering frontend structure, UI implementation, API integration, and interaction logic.
- Developed admin authentication, quiz CRUD features, session control, and player-facing quiz flows without page reloads.
- Created key product features including an admin dashboard, question editor, live player interface, timers, instant feedback, and results analytics.
- Debugged edge cases across admin and player workflows, improving the reliability and usability of the final application.

Saishang Jiangnan Travel Website
Sichuan Normal University

Jan 2022 – Jun 2022

- Built a React single-page travel website with interactive pages, core user flows, and backend API integration.
- Supported authentication, session control, and data synchronisation through frontend-backend integration.
- Improved usability and reliability through state management, performance optimisation, debugging, and functional testing.

EMPLOYMENT HISTORY

Customer Solutions Advisor
TPG Telecom

Apr 2026 – Present

- Work directly with customers to understand needs, identify issues, and provide practical solutions in a fast-paced technology retail environment.
- Diagnose customer problems by checking account and system information, asking focused questions, and guiding next steps clearly.
- Communicate technical and service information calmly while learning new systems quickly and taking ownership of customer outcomes.

Store Team Member
Woolworths

May 2025 – March 2026

- Processed customer transactions and online orders accurately in a fast-paced retail environment, maintaining attention to detail and efficiency.
- Collaborated with team members across checkout, service desk, and online order operations to support smooth daily store workflow.

Operation and Maintenance Intern
Suzhou Pengyu Micro-Grid Technology Co. Ltd

Mar 2022 – Jun 2022

- Supported daily operation and maintenance of web-based platforms, including issue monitoring, debugging, testing, and basic bug fixing.
- Investigated system errors using logs and frontend tools to identify root causes and support issue resolution.
- Performed routine checks and functional testing to help maintain stable platform performance after release.
