Stella Xiong

0421 103 706, stellaxiong420@outlook.com, https://www.linkedin.com/in/stella-xiong

PROFILE

- Front-end–focused web developer developing web applications with React and hands-on experience in backend services, database design, and API development.
- Proficient in building modern, scalable websites and web applications using React, JavaScript, HTML/CSS, RESTful APIs, MySQL, Node.js, and Docker, with a solid understanding of full-stack workflows.
- Experienced in delivering data-driven frontend features, integrating with backend systems, and supporting role-based web functionality, with additional experience in website operations and software testing through internships.

EDUCATION

Master of Information Technology January 2024 - September 2025
UNIVERSITY OF NEW SOUTH WALES

Bachelor of Network Engineering September 2018 - June 2022
SICHUAN NORMAL UNIVERSITY

SKILLS

- Front-end Web Development: React, Vue, JavaScript, HTML, CSS (responsive design, component-based UI, Figma)
- Back-end development: MySQL, API, Node.js, Docker
- Testing and Operations: Website operations, debugging, software testing
- Data & ML Fundamentals: Data analysis, machine learning, deep learning concepts
- Network Penetration Testing: Nmap, BurpSuite, SQLmap

PROJECT EXPERIENCE

Smart Assistant for Learning and Teaching Platform June 2025 - August 2025
Joint Project – University of New South Wales & Monash University **Score: 87 (High Distinction)**

- Developed a full-stack educational web platform simulating an AI assistant to support interactive learning between students and tutors.
- Led front-end development and UI/UX design using React and Figma, integrating the frontend with a modular Python backend via RESTful APIs and contributing to backend database and API design.
- Designed and implemented key features including course and assignment management, discussion forums, a centralized FAQ system, and a chat-based AI assistant for real-time Q&A.
- Built and maintained frontend tests using Vitest and React Testing Library, implementing API mocks to ensure reliable and maintainable component testing.

ReactJS Front-end BigBrain Quiz App Apr 2025
University Of New South Wales

- Solely developed a single-page React application (SPA) from scratch, implementing the complete front-end architecture and user interface.
- Integrated the frontend with backend APIs to support admin authentication, quiz management, and session control without page reloads.
- Designed and implemented core features including a dynamic admin dashboard for quiz CRUD operations, a configurable question editor, and a real-time player interface with timers and instant feedback.
- Built an analytics-focused results page featuring a top-5 leaderboard, correctness visualizations, and response-time charts to enhance gameplay insights.

Saishang Jiangnan Travel website January 2022 - June 2022
Sichuan Normal University

- Designed and developed a full-stack travel website, implementing the overall site structure and integrating front-end and back-end components end to end.
- Built the user interface using HTML, CSS, and JavaScript, and implemented dynamic server-side functionality with PHP and MySQL to support data transactions and site operations.
- Implemented core features including hotel and attraction booking, user registration and authentication, order management, and backend administration.
- Developed search functionality and interactive content management features to improve user engagement and overall usability.

EMPLOYMENT HISTORY

Operation and Maintenance Intern March 2022 - June 2022
Suzhou Pengyu Micro-Grid Technology Co. Ltd

- Maintained daily website operations and system stability, handling emergency incidents, bug fixes, and routine security checks in a production environment.
- Diagnosed and resolved website issues through debugging and basic security assessments, improving incident response efficiency.
- Collected and analyzed user experience feedback to support website optimization and usability improvements.

Software Testing Intern December 2021 - March 2022
Ningxia Zhongxiong Technology Co.Ltd

- Designed and executed test cases based on detailed product requirements, ensuring functional correctness before release.
- Reported defects using bug tracking systems and prepared structured test reports for cross-team review.
- Optimized and maintained test cases to improve testing efficiency, coverage, and overall test cycles.

Store Team Member May 2025 - Present
Woolworths

- Assisted customers at self-checkout stations and managed manual checkout operations, ensuring accurate and efficient payment processing.
- Prepared and packed online orders with a strong focus on accuracy, speed, and presentation quality.
- Collaborated with team members in a fast-paced retail environment to maintain smooth store operations and customer satisfaction.
