PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience building web applications using C#, .NET Core, ASP.NET Core Web API, React, and TypeScript, backed by SQL Server and RESTful APIs. Solid knowledge of clean architecture, design patterns (OOP, SOLID, TDD), automated testing with xUnit, and AWS cloud. Currently seeking a Software Engineer role to keep contributing and learning.

TECHNICAL SKILLS

Programming Languages: C#, TypeScript, JavaScript, Python, SQL, HTML/CSS

Frontend: React, TypeScript, MUI, HTML5, CSS3

Backend: .NET Core, ASP.NET Core Web API, Entity Framework Core, RESTful APIs, ASP.NET Identity, JWT

Database: SQL Server, MySQL, MongoDB

Cloud & DevOps: AWS (EC2, S3, RDS, CloudWatch, Lambda), Docker, GitHub Actions / Bitbucket CI/CD

Testing: Unit Tests, xUnit, Moq, FluentAssertions

Methodologies & Tools: Git, GitHub, Bitbucket, Jira, Swagger, Figma, Agile, Scrum

Design Patterns: OOP, SOLID, MVC, TDD, Clean Architecture

PROFESSIONAL EXPERIENCE

Software Developer — Recam Pty Ltd

Jun 2025 – Present

- Built and maintained full-stack web applications using C#, ASP.NET Core, and React with TypeScript, delivering features across the stack.
- Developed RESTful APIs with ASP.NET Core Web API following layered/clean architecture and SOLID principles.
- Designed relational data models with Entity Framework Core and SQL Server.
- Built responsive UIs with React and TypeScript from Figma designs, with a focus on usability and accessibility.
- Implemented request validation and DTO mapping to decouple API contracts from internal domain models.
- Developed unit and integration tests with xUnit, Moq, and FluentAssertions to improve quality and reduce regressions.
- Contributed to CI/CD pipelines automating builds and deployments across DEV and STAGING environments.
- Configured and supported cloud infrastructure on AWS (EC2, S3, RDS, CloudWatch, Lambda).
- Implemented authentication and authorization using ASP.NET Identity and JWT with role-based access control.
- Added structured logging and exception handling to improve observability and reliability.
- Collaborated in an Agile Scrum team through sprint planning, code reviews, and technical discussions.

IT Intern — Suzhou Pengyu Micro-Grid Technology Co. Ltd

Mar 2022 – Jun 2022

- Supported daily operation and maintenance of web-based platforms, including issue monitoring, debugging, testing, and basic bug fixing.
- Investigated system errors using logs and frontend tools to identify root causes and support issue resolution.
- Performed routine checks and functional testing to help maintain stable platform performance after releases.

PROJECT EXPERIENCE

UniTask — AI Learning Platform

- Built frontend workflows for an AI learning platform, translating product requirements into reusable React and TypeScript components (MUI).
- Developed modules for course management, assignment workflows, and role-based user interactions.
- Integrated RESTful APIs with an ASP.NET Core backend, debugging data-flow issues across frontend, backend, and SQL Server.
- Contributed to database and API design for course, assignment, and user-role management.
- Tested core user journeys, fixed bugs, and collaborated through code reviews and technical discussions to deliver within a fixed timeline.

EDUCATION

Master of Information Technology

University of New South Wales
